

Notes: The game app should not be the same as a game review website. Having user be able to leave reviews and look up other user scores will help differentiate the app. Including a way where users who have similar scores with game and suggest games that they have not played yet with cross-referencing scores could bring something new. Make suggestion like dating apps make suggestion with a list of likes and dislikes to make a game connection.

3 critical areas

- Top 10 Games
- Search for games by reviews.
- Searchable user profiles and reviews

3- example task

- Find a game in the top 10 and edit or make a review.
- Search for an action video game and write a review for it.
- Search for a gamer that has a high compatibility rating and see what other games they liked.
